

InsideBusiness Connect

Unattended file transfer: host to host

What?

InsideBusiness Connect offers an easy and safe solution for fast and automated processing of all your payments and reports. A host-to-host connection links your ERP system to ING's. This gives you direct access to ING's European network, for sending transactions and receiving reports. InsideBusiness Connect supports generic formats for your most-used instructions for creditors, SEPA and treasury payments. We also offer remote initiation and multi-bank reporting on your third-party bank accounts.

Easy to connect to ING

- You are in control: use your own software to connect to ING or install ING InsideBusiness Connect client software with its easy-to-use installation wizard
- A wide range of standard communication protocols
- Seamless link with your ERP system
- Benefit from efficient, guided implementation by an ING implementation manager.

Why?

- Convenience of a single platform for all your transactions and reports
- More control: choose your own technical set-up
- A secure and reliable host-to-host connection between your company and ING
- Additional online services to better control your channel and payments.

State-of-the-art security

- Confidentiality, integrity and non-repudiation guaranteed by the use of digital certificates
- No manual interventions, with 100% straight-through processing between your ERP system and ING, as often required by auditors.

How?

One platform for all your instructions and reports

- Manage all your accounts within ING's international network
- Deliver all SEPA Credit Transfers (SCT), SEPA Direct Debit (SDD) instructions, domestic credit transfers and international credit transfers throughout the ING network and receive order status reports
- Global cash overview of your ING and third-party bank accounts in your ERP system via end-of-day and intraday reports
- Support for a wide range of local country formats and MT101 for your third-party bank accounts.

Extra services via InsideBusiness

- Track & Trace your payments and collections
- Receive an alert if your connection to ING fails (requires InsideBusiness Connect client software)
- Online order authorisation giving you or your treasurer extra control of your funds
- Cancel a scheduled order or an individual transaction within an order
- Enter ad hoc and specific local payments.

Next?

Choose the connectivity solution of the future: InsideBusiness Connect - fast, automated, secure. Alternatively, we can offer you SWIFTNet and EBICS.
